6th Conference on Field Cycling NMR Relaxometry

June 4-6, 2009 - Turin (Italy)

The purpose.

The purpose of the workshop is to gather people with active interests in nuclear and electron spin relaxation, fast magnetic field switching experiments, low field magnetic resonance, nuclear electric quadrupole resonance, and magnetic imaging.

The discussions

will focus on magnetic field cycling experimental techniques, data interpretation and theory, as well as applications in all areas. Related applications performed by other low-frequency and low resolution **NMR** techniques are welcome as well.

The topics

will span a range including experimental issues, interpretative foundations, liquids, solids, porous and heterogeneous materials, polymers, biological materials, and diagnostics.
